Replace with actual unit photograph before publishing

## DETAILS

<b>Comes With:</b>	Hydraulic steel work blade (8'10"), hydraulic wedge-style Q/C coupler, 30" dig bucket, 54" clean-up bucket, AFL aux hydraulic flow attachment kit, HD undercarriage, stump pan, swap valve, pattern changer (CAT/Deere), combo plumbing with ball valve on stick, 2 cab-mounted LED lights, fire extinguisher, front screen and roof cab guarding
<b>Year:</b>	2026
<b>Serial Number:</b>	1FF135PAJSF002451
<b>Engine:</b>	Isuzu 3.0L Final Tier 4 Diesel — 101 HP
<b>Operating Weight:</b>	33,920 LB
<b>Max Reach:</b>	29'2" (8.9 m)
<b>Max Dig Depth:</b>	20'0" (6.1 m)
<b>Arm Length:</b>	9'11" Long Stick
<b>Boom Design:</b>	Three Welded Bulkhead Boom
<b>Track Pads:</b>	28" Wide Triple Semi-Grouser Steel Pads — HD Undercarriage
<b>Hydraulic System:</b>	Proportional auxiliary hydraulics with AFL kit, ball valve & swap valve on stick; CAT/Deere pattern changer
<b>Controls:</b>	Short-throw pilot levers & hydraulic controls
<b>Cab:</b>	Full Size Deluxe Cab with Heat / A/C & Radio
<b>Monitor:</b>	Multi-language LCD in-cab monitor with rear-view camera
<b>Security:</b>	Anti-theft monitor with multiple operator codes; battery disconnect / night switch
<b>Operating Modes:</b>	Power / Economy with Auto-Idle & Auto-Shutdown
<b>Fuel / DEF Tank:</b>	220 L fuel tank / 12 L DEF tank

<b>Lighting:</b>	LED cab lights + 2 additional cab-mounted LED lights installed
<b>Guarding:</b>	Front screen & roof cab guarding (FOG standard)

## DESCRIPTION

When you choose to rent the 2026 John Deere 135P from Riverside Equipment Rentals, you're getting a purpose-built mid-size excavator arriving fully loaded — hydraulic blade, quick-coupler, thumb, two buckets, AFL aux kit, pattern changer, swap valve, stump pan, and full cab guarding all included. At 33,920 LB with a 9'11" long stick, 29'2" of reach, and 20 feet of dig depth, the 135P is the right machine when you need serious capability without moving up to a larger class. Here are the key features that make the John Deere 135P the ideal choice for your project:

- **Fully Equipped — Everything Included:** Unit arrives with a hydraulic work blade (8'10"), wedge-style Q/C coupler, hydraulic thumb, 30" digging bucket, 54" clean-up bucket, AFL auxiliary hydraulic flow attachment kit, HD undercarriage, stump pan, swap valve, CAT/Deere pattern changer, combo plumbing with ball valve on stick, 2 extra cab-mounted LED lights, fire extinguisher, and front screen and roof cab guarding — one of the most complete attachment packages available on any rental unit in the region.
- **101 HP Isuzu 3.0L Tier 4 Final Engine:** The proven Isuzu 3.0L Final Tier 4 diesel delivers 101 HP of reliable, clean-burning power. With a 220L fuel tank and 12L DEF tank, the 135P is built for long-duration shifts on remote or high-production project sites across the Fraser Valley, Vancouver Island, and the Lower Mainland without frequent fuel stops.
- **9'11" Long Stick — 29'2" Reach & 20'0" Dig Depth:** The extended 9'11" long stick gives the 135P exceptional reach and dig depth for its class — ideal for deep utility trenching, pond and drainage construction, foundation work, slope grading, and pipeline corridor excavation where maximizing production per machine position is critical.
- **Three Welded Bulkhead Boom Design:** The three welded bulkhead boom construction delivers superior structural rigidity under heavy torsional and side loads. This proven design extends structural service life on high-cycle, high-force applications including rock breaking, heavy material handling, and demanding demolition-adjacent site work.
- **HD Undercarriage with 28" Triple Semi-Grouser Steel Pads:** The heavy-duty undercarriage combined with 28" wide triple semi-grouser steel pads provides the track grip, flotation, and durability needed for demanding BC terrain — from wet riverside conditions to compacted gravel and rocky hillside work — while protecting undercarriage longevity over an extended rental lifecycle.
- **AFL Aux Hydraulic Kit — CAT/Deere Pattern Changer — Swap Valve:** The AFL (Auxiliary Flow) attachment kit, combined with the CAT/Deere pattern changer and swap valve, means the 135P is immediately compatible with virtually any hydraulic attachment on your site — hammers, compactors, augers, tilting couplers, mulching heads — without re-plumbing or adapters. The ball valve on stick adds further flow control flexibility.
- **Hydraulic Steel Work Blade (8'10"):** The front-mounted hydraulic work blade makes the 135P self-sufficient for backfilling, leveling spoil material, fine grading approaches, and stabilizing the machine on steep terrain — reducing the need for a separate grading machine and maximizing productivity per mobilization on your project.
- **Short-Throw Pilot Levers with Power / Economy Modes:** Short-throw pilot controls minimize operator input effort and fatigue during continuous operation. Power mode delivers maximum output for high-production digging and breaking; Economy mode reduces fuel consumption during lighter-duty work such as grading, backfilling, and material handling.
- **Full Deluxe Cab with Multi-Language LCD Monitor & Rear Camera:** The full-size deluxe cab features heat and A/C, radio, multi-language LCD in-cab monitor with rear-view camera, LED lighting, and front screen and roof cab guarding — providing operators with the visibility, comfort, and protection needed for long shifts in BC's variable project conditions.
- **Anti-Theft Monitor with Operator Codes & Battery Disconnect:** The anti-theft monitor with multiple operator access codes and battery disconnect / night switch provides strong machine security on unsupervised or multi-crew project sites — protecting your rental investment and reducing unauthorized use risk throughout the rental period.

Renting the 2026 John Deere 135P from Riverside Equipment Rentals means getting a brand-new, fully maintained machine with the most complete attachment and guarding package in its class — delivered on your schedule by a team that has been supporting BC construction since 1991. We're available on call 24 hours a day, 7 days a week, with flexible rental terms and competitive rates built

around your project timeline.
